

## STOCKADE® Specialty Minerals

For Beef Cattle on Pasture

### Kandy Mag Mineral

*Aids in the Prevention of Grass Tetany*

**#40155** This highly palatable high magnesium supplement contains a special blend of molasses and other tasty ingredients that make cattle eat it like candy. Kandy Mag also delivers balanced levels of other minerals and vitamins that are essential for cattle. Make sure cattle get proper magnesium intake to help aid in the prevention of grass tetany with Kandy Mag!

### Mag Lix Mineral

*Aids in the Prevention of Grass Tetany*

**#40158** Grass tetany, which is caused by magnesium deficiency, can strike quickly. Be assured that your cattle are getting adequate levels of magnesium with Mag Lix Mineral. This highly palatable mineral is specially formulated for enhanced magnesium. Simply provide in appropriate covered mineral feeders and make sure cattle don't run out. What could be easier?

## Consistent High Quality

STOCKADE® mineral supplements are made from only high quality ingredients chosen with animal performance in mind. STOCKADE® has some of the highest manufacturing standards in the industry and is devoted to product safety and consistency.

# STOCKADE® Bullseye® Line

 For Beef Cattle on Pasture

STOCKADE® Bullseye® minerals are formulated to meet the nutritional needs of beef cattle. Each product in the Bullseye line is guaranteed to meet or exceed the NRC-recommended levels for trace minerals.

STOCKADE® Bullseye® minerals are made with only high quality ingredients and offer superior palatability along with sound nutrition for an excellent value. The wide variety of products allow you to switch products as conditions dictate without compromising your overall nutritional program. STOCKADE® Bullseye® minerals are also designed to mix and match well with STOCKADE® protein blocks and tubs to create a custom supplement program for your cattle.

## Bullseye® 4 Mineral

**#46733** An excellent all-around cattle mineral for the commercial cow/calf producer. Ideal for cattle on good to excellent quality forages, this highly palatable mineral will reliably deliver essential minerals and vitamins day in and day out. Just place mineral in appropriate covered mineral feeders and make sure they don't run out.

## Bullseye® 8 Mineral

**#46732** Ideal mineral for the cow/calf operator with pregnant or lactating cows. Provides extra phosphorus that is important for lactation and calf development, while also meeting or exceeding NRC requirements for trace minerals and vitamins. Offer to cattle on a self-fed basis in protected mineral feeders.

## Bullseye® 12 Mineral

**#40159** High phosphorus supplement ideal for lactating cows on forages known to be low in phosphorus or for balancing diets high in calcium due to hard water or legumes. High quality ingredients help make this mineral palatable so that cattle get the nutrients they need on a daily basis. Just offer on a self-fed basis in protected mineral feeders.

## Bullseye® 4 Fly Control IGR.01

**#46735** This high quality, self-fed mineral contains Altosid® IGR for safe and effective control of horn flies in cattle. Altosid® safely interrupts the fly lifecycle and prevents adult flies from maturing. Altosid® requires no slaughter or milk withdrawal in cattle.

## Bullseye® Hi Mag Mineral

**#46734** Protect cattle from the risk of grass tetany. This highly palatable mineral will not only deliver essential magnesium but will also deliver NRC-recommended levels of trace minerals and vitamins. Use STOCKADE® Bullseye® Hi Mag Mineral whenever conditions are suitable for grass tetany.

## Why are NRC Levels Important?

Minerals play an important role in beef cattle production, from immunity and hoof health to reproduction and growth. The NRC-recommended levels represent the established daily dietary needs of most cattle under average conditions. When you feed STOCKADE® Bullseye® minerals you don't have to wonder if your cattle are getting all they need, because the work has been done for you!
